

Proposal for Special Session to TAAI 2007

Innovative Approaches to Pervasive Applications

I am organizing a special session on **Innovative Approaches to Pervasive Applications** for TAAI 2007, which will be held in National Yunlin University of Science and Technology, Douliou, Yunlin, Taiwan, Nov. 16-17, 2007. It brings together researchers working across this field to share their experience and discuss advanced techniques. Topics of interest include, but are not limited to:

1. Pervasive applications using wavelet
2. Pervasive applications using support vector machines
3. Pervasive applications using quantum computing
4. Pervasive applications using grey model
5. Pervasive applications using hybrid intelligent model
6. Pervasive applications using QoS Guarantees
7. Pervasive applications using circuit simulation
8. Pervasive applications using wireless networking
9. Pervasive applications using embedded technology
10. Other emerging approaches to pervasive applications
